(54) Title: PARALLEL TYPE SHAPE CREATION/SHAPE DISPLAY APPARATUS

(54) 発明の名称 並列型形状創成/形状表示装置

(57) Abstract

A sequential/simultaneous parallel processing is executed for a shape engine/geometric engine/graphic engine as an apparatus for creating/displaying three- or two-dimensional shape. Therefore, a communication tool capable of accomplishing an animation image

ABSTRACT

By the present invention, not only a game generating and/or executing environment but also a communicating tool for the dynamic or time-varying image process in multi-media can be constructed more freely and easily than that of recent products, because the sequential and/or simultaneous parallel process is carried out on the shape engine and/or the geometric engine and/or the graphic engine as a device which creates and/or displays a 3D shape or a 2D shape.
